Mentoring skills and competences

During the last 10 years I have been supervising for their final theses or research projects more than 30 BSc Students, more than 20 MSc Students, 4 PhD Students and 2 Post Docs. The projects I assign are usually very practical and connected to clinical open questions. I highly encourage student internships during the final year (where I established several agreements with local clinical Institutions and Companies) and training experience abroad, especially taking advantage of Erasmus Project and other specific travel grants. I have been the Academic Tutor for 4 Erasmus traineeship projects (2 with Germany, 1 with Switzerland and 1 with Portugal) and 2 "Messaggeri della Conoscenza" travel grants (awarded by the Italian Minister of Education) where 2 BScs student spent 2 months at Harvard Medical School in Boston. About 90% of my students were able to get a job in related bioengineering field within 6 months from graduation, sometime with excellent position in Siemens, General Electrics and other Biomedical Engineering companies.
